**BUNDLE Edge-PC
& IP65 Touch-Monitor
& Single-Cable-Solution**

ONLY Q4/ 2025

THE SMART DUO:

EDGE-PC and Industrial Touch Monitor

Exclusive trade fair bundle for our customers and at All About Automation in Chemnitz.

Discover our powerful bundle for modern industrial and IoT applications!

At its heart is our latest edge PC, the BPCPRO-X51, based on the Intel® Amston Lake platform, which impresses with its innovative USB-C interface: a single cable transmits video, power, and USB signals simultaneously, saving valuable installation time and significantly reducing maintenance costs.

We combine the PC with the 21.5" PCAP monitor IPPL-W215 from iBASE with a robust IP65 front and IP54 rear for industrial use. The connection between the PC and monitor is made via a screw-on USB-C cable (accessory package).
